Star brite® was founded in 1973 based on a line of automotive maintenance items. The company’s key product was an innovative car polish formulated with special cleaners. It quickly and easily restored dull, oxidized paint, using space-age polymers to provide a beautiful shine and extremely long-lasting protection. The company soon thereafter expanded the product line to include marine and RV products.

In the late 1970s Star brite® expanded its market base by opening a distribution center near Toronto, Canada, an office in Lyon, France, and a warehouse facility in Rotterdam, The Netherlands. The company issued an IPO in the mid-1980s as Ocean Bio-Chem, Incorporated (OBCI). Star brite® products are now sold in virtually every developed country in the world and the firm is the leader in its various fields.

Today, Star brite® continues to bring new and innovative products to specific markets. The company currently markets specialty products to the marine, automotive, power sports, outdoor power equipment, RV, trucking, home care and aviation industries. In addition to its chemical product offerings, the company also manufactures a complete line of brushes, handles, related cleaning aids, tie-downs and bungees. Star brite’s main manufacturing and distribution facility is Kinpak Inc., in Montgomery, Alabama. Kinpak also manufactures numerous items under a private label program for major oil companies and consumer goods retailers.

The facility consists of a 300,000 s.f. manufacturing, blending, packing, and distribution center utilizing RF technology. The plant has a 475,000 gallon tank farm, an on-site laboratory, quality control center, four blow-molding machines for PVC and HDPE bottles and eight fully-automated high-speed filling lines. Kinpak also has a five-acre marine terminal on the Alabama River for accepting shipments of raw materials by barge and rail.

Star brite® products are available at most marine retailers, sporting goods locations, farm stores, discount chains, automotive and RV stores worldwide.
